

In 2017, Dr. Quach Thi Khanh Ngoc participated in different conferences in Singapore, Indonesia and Australia that helped her to present her works. In August, she presented her work funded by NORHED at the 7th Congress of the East Asian Association of Environmental and Resource Economics (EAAERE) "Environment and Sustainable Development: Issues, Challenges, and Solutions" in Singapore. She has gotten fresh perspectives on the research related to natural resources and climate change from this Congress.

In November, she was invited to present her work on the climate change impact on coral reef ecosystem at the 3<sup>rd</sup> Monash Environmental Workshop in Australia. She has received valuable comments and suggestions for her paper from environmental economists from Australia, UK and US.

Under the funding of UK research council, Ngoc also attended the workshop held in Indonesia: UK – Southeast Asia Researcher networking: Understanding the impact of hydrometeorological hazards in Southeast Asia. This workshop helps her to set up research network, and to share and to develop her research ideas.

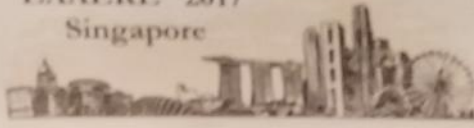

The funding of NORHED project bring her good opportunities for career development. She has one paper accepted in Marine Policy and has been revising another paper to resubmit to Ecosystem Services.

EAAERE 2017  
Singapore

# Welcome

to the  
The 7th Congress of  
the East Asian Association of  
Environmental and Resource Economies  
(EAAERE 2017)

*"Environmental and Sustainable Development:  
Issues, Challenges, and Solutions"*
